

JOINT COVERS FOR EXPANSION JOINTS IN WALL AND FLOOR AREAS

FOR AGGRESSIVE MEDIA/IN HYGIENIC AREAS/
FOR REFURBISHMENT AND DRY-WALLING/AS FIELD LIMITATIONS

MIGUTEC

YOU FIRST.

MIGUA is one of Europe's leading experts in the design, manufacture and installation of expansion joint systems. MIGUA expansion joint systems serve to cover, close and seal expansion joints. Our products satisfy the most rigorous standards in quality and safety and are widely used in large-scale construction projects such as airports, train stations, industrial plants, parking structures, shopping centres and hospitals. Every day, our experienced team do their utmost to make your building project successful. We are not satisfied until you are satisfied. Because our guiding principle is: **MIGUA – you first.**

Over 600 products for one purpose: Yours.

With five brands and over 600 proven expansion joint systems, we've got the diverse structural needs of today's construction projects covered. We confront problems such as heavy traffic loads and meet exacting standards in water resistance or hygiene. Floors, walls or roofs, MIGUA offers the perfect solution for any surface. Products of the highest quality are fundamental to our business; yet our ultimate priority is always customer satisfaction. We offer you a wide range of services to make your building project successful: Starting with competent advice, followed by technical application support on site up to the complete installation service. And since we know that the requirements for expansion joints are just as individual as the buildings themselves, we gladly develop your own very special joint cover system solution based on your requirements. And that is what we call our MIGUA 360° Service.

Legal notes	83

WITH MIGUTEC, MIGUA OFFERS A COMPREHENSIVE RANGE OF **JOINT COVERS AND SYSTEMS FOR EXPANSION JOINTS.**

Our MIGUTEC range covers a wide selection of joint covers for simple applications which also have high architectural requirements. We have divided our MIGUTEC catalogue in application areas to make it easier for you to find what you are looking for.

Our floor expansion joint covers are available with a variety of inserts and in various standard colours. On request, we will manufacture a special colour according to your requirements.

Brackets are made from a high-quality aluminium alloy in order to offer you a durable expansion joint cover even with low wall thicknesses. In addition,

some of our joint covers also have stainless steel brackets in order offering a solution suitable for use where they may be subject to aggressive media loads. Smooth inserts are suitable covers for the hygienic areas in hospitals, kitchens and swimming pools.

For the purpose of refurbishment, renovation and modernisation, the MIGUTEC range also contains expansion joint covers suitable for retrofitting.

Our wall and ceiling joint covers are offered with inserts, but also with a metal surface and a clip construction for simple installation.

We are here for you!

If you have any questions about our products, we would be happy to help.

Specifications regarding the load capacity

Pictogramm					
Meaning	Pedestrians	Private cars	Lorries DIN 1072	Forklift trucks DIN 1055	Solid plastic tyres

The load specifications of air-filled and solid plastic tyre trucks apply to a wheel contact patch of 200 x 200 mm.

Detailed views of the wall connections mentioned can be found on page 81.

Note regarding installation

Assembly and installation instructions are available on request.

Please feel free to contact us.

Alternatively, information can be downloaded from our website at

www.migua.com

* Depending on minimum quantities and against surcharge. Please contact us.

FÖRDERMITGLIED IM

MIGUARCHITECT.COM THE MODULAR PLANNING SYSTEM IN WEB PAGE FORMAT

With the website miguarchitect.com, MIGUA now offers an innovative work aid especially for architects and planners. This bespoke website was developed in the form of a working tool that contains information relevant only to planning. In addition

to tender texts and BIM files, the site also offers cleverly prepared basic know-how on the subject of planning with joints.

Miguarchitect.com was recently awarded the German Innovation Award 2019.

SETTING NEW STANDARDS ALSO IN DESIGN

There is much more to MIGUA expansion joint covers than their high quality and impressive functionality. The newly developed 'Generation X' MIGUTRANS joint covers also meet high design standards in building architecture. The distinctive stylistic vocabulary the smooth surface design is indicative of this. This special structure ensures a

harmonious appearance with the new expansion joint covers - they are all marked with an X behind the joint cover designation. Equally innovative is the beautifully designed MIGUA Befestigungsmatrix® (fastening matrix), which allows for a well thought-out, flexible positioning of the screws and thus easier installation.

EFFICIENT PLANNING OF JOINTS WITH BIM

MIGUA is the first expansion joint cover manufacturer in Germany to support architects and planners in the efficient planning of joints using BIM objects. And that involves everything from the early design phase to the concrete execution.

This means that even in the early planning phase (service phase 3), when hardly any exact information is available about the joint cover required in the future – such as joint width, required movement absorption and load – initial planning can be carried out

very easily with a basic file, the so-called MIGUA BIM Basic. Once detailed requirements for the expansion joint cover are known (service phase 5), the planner can complete his work with the concrete BIM object without any additional effort.

At present, BIM objects for the watertight (MIGUTAN) and full metal expansion joint cover systems (MIGUTRANS) are already available – Details regarding other expansion joint cover systems will follow shortly.

INNOVATIVE AND SUSTAINABLE SOLUTION FOR REFURBISHMENT AND MODERNISATION

With the FSRX, MIGUA has developed a joint cover that can be replaced quickly, easily and in a cost-effective manner during operation. With this replaceable full metal joint cover, only the visible, most heavily loaded part of the joint cover is unscrewed and replaced by a new one. Time-consuming dismantling and removal of the adjacent floor covering is no longer necessary with this design. Above all, the clear advantage and added value for investors here is the reduced downtime of

the respective areas, in addition to the time saved and the minimised wage and material costs resulting from it.

In addition, the joint cover contributes to sustainability, as far less material is required for the renovation / modernisation with regard to the joint cover itself and the floor covering. The FSRX was also recently awarded the German Innovation Award and a patent application has been filed.

EXPANSION JOINTS ACCORDING TO AREAS OF APPLICATION

Expansion joint covers for floors

Aluminium brackets in conjunction with an elastic insert made of quality Synca. Inserts are available in many colours and types. The inserts are optimised for connection to carpet or plastic surfaces. Some of the expansion joint covers are available with stainless steel or brass caps. This type of joint is frequently used in screed in combination with tiles and various coverings such as a carpet or plastic flooring.

Expansion joint covers for aggressive media

Stainless steel brackets made from various alloys (1.4301 and 1.4541), for various loads, combined with inserts for various movements thus ensuring good durability with regard to aggressive media. We would be happy to examine the suitability for your needs based on the type and concentration of the media used. Please contact us.

Expansion joint covers for hygienic areas

Various smooth inserts in combination with a variety of different brackets made from aluminium or stainless steel. The smooth inserts have been designed specifically for hygienic areas in hospitals, kitchens and swimming pools and are both anti-bacterial and physiologically safe.

Expansion joint covers for refurbishment, renovation and modernisation

Brackets for affixing to the surface, for subsequent installation, form the basis for this area of use. Inserts made from quality Synca. Inserts are available in many colours and types. Some expansion joint cover types are also available with inserts for connection to carpet or plastic floorings.

EXPANSION JOINTS IN ALPHABETICAL ORDER

Expansion joint covers for field limitations/control joints

In order to counteract tension in the upper floor, it is necessary to divide the floor into fields. Field limitations/shrinkage joints can be used to reduce these tensions. MIGUA offers expansion joint covers constructions designed specifically for this application. They meet both the optical and functional requirements of the task.

Wall and ceiling joints

MIGUA expansion joint covers for walls and ceilings include a variety of different covers for areas with plaster, tiles, dry-wall, cement, suspended ceilings and facades. Some of the covers are made up of aluminium brackets with elastic inserts. In addition, MIGUA also offers further joints with metal, plastic or Snyca covers.

Expansion joint covers of series FLK 21 are supplied with flush mounted distance insert of FL 21. The top edge of the aluminium joint cover can be used as a screeding guide. The distance insert protects the expansion joint cover until covering is laid. This method avoids damage of joint cover caused by site traffic.

Production length: 4 m

Standard colour: Grey

Wall connections: E3, E4

FGH 65

THE EXPANSION JOINT COVER FOR AREAS WITH STRICT HYGIENIC REQUIREMENTS AND HIGH AESTHETIC DEMANDS

MIGUTEC

JOINT COVERS FOR EXPANSION JOINTS

- 1 Ultra-smooth insert for residue-free cleaning**
Thus optimal sterility and physiologically safe
- 2 Seamless, symmetrical visible surface**
Hard-wear special insert for smoother, low-noise transit
- 3 Innovative solution**
Suitable for hospital-typical vehicles, such as hospital beds and food trolleys
- 4 High load capacity due to sturdy construction**
Solid aluminium brackets
- 5 Secure fixing due to MultiHole mounting bracket**
Flexible anchoring and excellent bond

Ideal for use with various types of floor covering

JOINT COVERS FOR EXPANSION JOINTS

- 1 Flexible high quality elastomeric insert**
Hard wearing, temperature resistant (-30°C to +120°C), replaceable
- 2 Smooth visible surface for easy cleaning**
Antibacterial and physiologically safe
- 3 Solid stainless steel brackets**
Resistant to aggressive media (e.g. sea water)
- 4 Multi directional movement**
Expansion joint cover takes on settling
- 5 Secure fixing with MultiHole mounting bracket**
Firm bond and extraordinary gripping strength

Installation instructions: Any unevenness in the surface to which the joint cover is being fixed must be remedied by using an epoxy adhesive e.g. Reckli-Adhesive EP. Thereafter the aluminium brackets must be fixed on both sides with countersunk stainless steel screws e.g. Multi Monti type MMS-7,5 ES or similar, at 200 mm intervals.

Fit for traffic with pallet trucks or forklift trucks

Under the condition of sufficient load-bearing capacity of the ground

With solid aluminium brackets

EPDM insert covers entire joint height

UV/Ozone consistent

High resistancy against chemicals

Slim visible surface

High pressure and deformation resistancy of the EPDM filler material

Smoothed surface for better connection with adjacent flooring

Suitable for subsequent grinding

Reduction of sound impact

JOINT CONNECTIONS EXPANSION JOINT COVERS

The matching height and side connection of joint cover lengths is carried out by way of connecting pins that slide into place (series ESF 10, ESF 27 and ESF 37) or by way of sliding of securing anchors to the joint cover buffet (series ESF 16).

**Connecting pins that slide into place,
example ESF 27/40 AL**

**Sliding of securing anchors,
example ESF 16/45 AL**

INSTALLATION NOTE EXPANSION JOINT COVERS

Expansion joint covers Between the cut-outs of the two aluminium angle joint covers, a joint filler is installed which is not included in the scope of delivery.

Series ESF 8, ESF 9 and ESF 10 : 5 mm,
series ESF 22 NI : 12 mm,
series ESF 16 : 10 mm,
series ESF 27 : 15 mm,
series ESF 37 : 25 mm.

The height of the joint filler depends on the required overall height. The separation must be made down to the raw concrete.

Before installing the expansion joint covers, make sure that the brackets are clean and free of grease. The slotted brackets of the joint cover are pushed into the first freshly applied mortar or screed layer and the joint cover is levelled to the correct height.

Then mortar or screed are used to complete the final surface.

Further intersection variations are available on request

Application for suspended ceilings

- 1 Simple handling**
Perfect combination of rigid edges and flexible concertina-part
- 2 Easy application**
Light weight allows fast overhead installation

Expansion joint cover	Total movement Δb_f [mm]	Visible width b_s [mm]	Joint width total b_t [mm]	Joint height h [mm]
CP 25/25	50 (± 25)	25	50	25
CP 50/25	70 (± 35)	50	75	25

Visible width of expansion joint depends on ceiling construction.

Production length: 4 m
Standard colour: Beige.

WALL CONNECTIONS CORNER VERSIONS

These wall connection versions are also available for the products lines: FK, FKN, FT, FTN, FG, FNG and FPG 55
